

permitting at least one customer household to preselect and record transmitted movies;

permitting the at least one customer household to playback for viewing any preselected, recorded movie;

communicating movie playback information from the at least one customer household to a central controller system; and

using the communicated movie playback information to bill the at least one customer household for only those preselected, recorded movies that are played back for viewing.

CJ  
BL  
end

10. (AMENDED) The method of claim 1 including the step of utilizing the movie playback information communicated to the controller unit to credit an account of a content provider who provide the movies for distribution.

B2

21. (AMENDED) The method of claim 1, wherein the step of blanket transmitting further includes transmitting using transponders operating at power levels of at least 240 watts.

B3

24. (AMENDED) A method of distributing movies to customer households comprising the steps of:

blanket transmitting a plurality of movies to a plurality of customer households;  
recording for storage on DVD RAM at at least one customer household,  
transmitted movies that are preselected by a customer;
